

Telemedicine Visits

Dear Patients,

As a safety measure for you and our staff Fort Worth Heart will be rolling out telemedicine visits (exam with your provider via FaceTime or Skype) as soon as possible. In order to have the best Telemedicine experience with your provider, we've provided a checklist for you in preparation for the visit.

- In keeping with H.I.P.A.A compliance, tele-visit is not to be recorded, and only one appropriate caregiver should be present for visit
- Please locate a quiet well-lit room to have your appointment
- Please limit possible distractions to you or your provider
 - Family members
 - Television background noise
 - Pets
- If you own a blood pressure machine, please have it readily available should your provider request a reading
- If you own a Pulse Oximeter, please have it readily available should your provider request a reading
- Please have your current medication list or bottles available for your appointment
- If you have a FaceTime or Skype compatible computer or tablet, that is preferable to using your cell phone

Thank you for choosing Fort Worth Heart!
